Towards Greener Future

ABOUT US

Malaysian Tribology Society

MYTRIBOS was established in 2007 and had officially been registered with the Malaysian Registrar of Societies a year after. Starting from 2016, MYTRIBOS is affiliated to the International Tribology Council (ITC). The main objective of MYTRIBOS is to promote proper practices in research and development related to the field of tribology in Malaysia and to facilitate collaborations between academia and industry in all possible endeavors. Currently, MYTRIBOS has more than 100 registered members with different disciplinary background from local and international universities, industries and research institutes. MYTRIBOS has been active and will continue to organize various activities such as conferences, seminars, workshops, training, publications, and community services in the spirit to promote a better industry-community-academia network in local and international arena.

VISION

To promote research and development in the field of tribology in Malaysia within academic and industrial organizations.

MISSION

- To facilitate the exchange of information technology in tribology amongst tribology practitioners in Malaysia.
- To cooperate and affiliate with other regional or International professional bodies having similar interests to those of the society.
- To support and sponsor academic and research activities among members.
- To print and circulate publications in areas related to the field of tribology.
